Summary

Frontend Developer specializing in React, Redux, and modern JavaScript with experience building production-ready applications. Proven ability to deliver full-stack solutions, collaborate in Agile teams, and rapidly adopt new technologies. Leverages AI-assisted development tools to increase efficiency and accelerate learning while maintaining code quality and deep understanding of implementations. Strong foundation in component-based architecture, state management, and RESTful API integration.

Technical Skills

- **Frontend:** JavaScript (ES6+), React, Redux Toolkit, HTML5, CSS3, Bootstrap, Responsive Design
 - **Backend:** Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication
 - **Tools & Practices:** Git/GitHub, Agile/Scrum, Jira, VS Code, CI/CD (Render), Accessibility (WCAG), AI-Assisted Development
 - **Additional:** .NET Core, C#, MySQL, Adobe Creative Cloud, UX/UI Design
-

Professional Experience

VacationPort (Remote) — Software Developer | July 2024 – Present

- Build 5+ responsive partner websites using HTML, CSS, JavaScript, and Bootstrap
- Collaborate with 5-7 person development team using Jira for project tracking and daily standups in 2-week Agile sprints
- Resolve front and back-end defects across .NET Core applications
- Partner with UX/UI designers to translate wireframes into production-ready, accessible code

Power Express Delivery (Carmel, IN) — Amazon Delivery Associate | Dec 2023 – Jul 2024

- Maintained 98%+ delivery accuracy and efficiency in high-volume operations.

EZAdsPro (Carmel, IN) — Senior Graphic Designer | December 2017 – March 2023

- Led digital and print advertising projects for 50+ clients, managing tight deadlines and stakeholder expectations
 - Converted legacy print campaigns to responsive digital formats, establishing standardized workflows
-

Projects

Food Chain Rumble — Full-Stack MERN Application (WIP)

- Built competitive gaming platform with user authentication, real-time leaderboards, match tracking, and community forums
- Implemented Redux Toolkit for state management across 20+ components; designed RESTful API with 15+ endpoints using Node.js/Express with JWT authentication and security middleware
- Created MongoDB schemas for users, matches, and nested forum comments; developed voting system with real-time updates
- Deployed to production using Render with MongoDB Atlas and CI/CD pipeline

Tech: React, Redux, Node.js, Express, MongoDB, JWT, REST API

Destination & Supplier Sites (VacationPort)

- Developed responsive partner websites optimizing layouts, content delivery, and user engagement
- Collaborated with design and marketing teams to implement custom CMS themes improving partner retention

Tech: HTML, CSS, JavaScript, Bootstrap, CMS theming

React Shop — E-Commerce Demo

- Full-featured shopping cart with Context API state management, React Router, and FakeStore API integration

Tech: React, Context API, React Router, REST API

Tough Mudder Redesign — Adobe XD Prototype

- Responsive website redesign from Adobe XD wireframes

Tech: HTML5, CSS3, Adobe XD

Education

Ivy Tech Community College — AAS Software Development, 2023

Ball State University — BFA Visual Communication, Minor in Marketing, 2017
